**The Second EPS M10 Hovercraft Commissioned at the Kingdom of  
Saudi Arabia Border Guard Base, Aziziyah, Saudi Arabia**

The second of two EPS M10 Hovercrafts was delivered by EPS Corporation of Tinton Falls, New Jersey to the Kingdom of Saudi Arabia Ministry of Interior Border Guard and was subsequently commissioned by the Border Guard on 8 October 2011 as “Sanafer.” Hovercraft “Sanafer”, along with Hovercraft “Alwajh”, the first American-built EPS M10 Hovercraft, will service the Kingdom of Saudi Arabia Border Guard’s Eastern Region.

The successful engineering, manufacturing and delivery of the two EPS M10 vessels establish EPS as a leader in composite technology and marine vessel integration. EPS M10 Hovercrafts are built at the company’s facilities in Titusville, Florida. Uniquely designed, the EPS M10 is constructed of non-corrosive, fiber-reinforced advanced composites which are environmentally friendly and provide significant reduction in operating, maintenance, and through-life costs. The EPS M10 Hovercraft is a fully amphibious, air-cushioned vessel that can operate effectively at sea, in shallow waters and over any land surface. EPS builds these crafts under a license from ABS Hovercraft Ltd.

All inquiries about EPS Hovercrafts can be made by contacting EPS Chairman and CEO, Mr. Francesco A. Musorrafiti, at [hovercraft@epscorp.com](mailto:hovercraft@epscorp.com). Further information about EPS Hovercrafts can be found on the company website [www.epscorp.com](http://www.epscorp.com).
